

16mm X 12mm - Anodised Aluminium Mounting Channel with Frosted Cover

This anodised aluminium mounting channel allows you to mount 10mm x 6mm warm white MicroLED neatly under stairs, coping stone, or along rills (Note LED strip light shown in the image is not included)

PHYSICAL & ELECTRICAL DATA

- External dimensions 16mm x 12mm
- Internal dimensions 11mm x 10mm
- Clear anodised finish
- Supplied in 1000mm lengths
- complete with opaque clip on cover 42g

INSTALLATION

The channel may be glued or drilled and fixed to the surfaces using countersink screws. Note that drilling anodised aluminium effectively removes the protection the anodising provides which can lead to corrosion around the holes over time.

COMPLIANCE & WARRANTY

This item has no warranty due to the nature of installation. The application of adhesive or drilling holes voids the warranty
