

E6531 - Compact Bollard Light - Black - 12v G4

Description

E6531 Uses a 2w, 3w or 4w cap LED lamp - recommended for driveway and path lighting, especially if timer-operated for long periods. This minimises energy consumption and lamp replacement. This bollard light is supplied as standard with a finned spike for installation in soil and gravel.

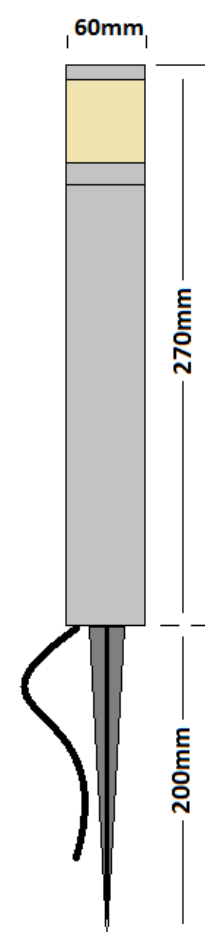

Colour/ Finish	Black powder-coated aluminium
Exterior Dimensions	Body 270mm tall x 60mm wide; comes with a 200mm spike.

12v G4	Wide beam	Pre-wired 2m
IP66	Retrofit LED	Dimmable

Pre-wired with 2m rubber cable. 12v version can be connected with cable joint kits (T9962), cable splice kits (t9963), a junction box or a T9969 underground joint kit. Ensure soil is loose enough for spiking into the ground: forcing the spike into hard soil may damage the fitting.

12v operation requires power from a transformer or PSU, order separately.

2 YEAR WARRANTY

Exclusions: Damage by machinery, animals or the use of incorrect cleaning materials. Corrosion due to exposure to salt or chlorine. Damage due to incorrect installation practices. Responsibility for 3rd party cost; indirect or consequential loss
