

EP9945MV- Polus Asymmetric LED Recessed Spotlight - 240v-9w 316 Stainless Steel

Description

Polus Asymmetric outdoor LED spotlights are designed for lighting small trees and facades from a close position. The Polus is a high quality, LED recessed lighting fixture with an asymmetric reflector capable of projecting a medium 45° beam upwards to light a tree canopy or facade while still providing coverage at the base. The perfect light when positioned at the foot of an outside wall, and being particularly effective at guarding against glare and where the control of the light spread is important. Purchase transformer separately.

Installation guidelines

The plastic sleeve is built in during construction or retrofitted into a hole cut with a coring bit: the light pushes into the tube, where it is held firmly in place by an o-ring. **Using a single RCD for large numbers of 240v fittings is not recommended due to the risk of nuisance tripping. We advise the use of separate RCD protection for each circuit and a maximum of 12 fittings per RCD. Where a garden lighting installation of more than 12 spike mount or recessed lights per circuit is proposed, we suggest the installation of 12v units with transformers, which results in a significantly higher fault tolerance and reliability in the total installation.**

3 YEAR WARRANTY

Exclusions: Damage by machinery, animals or the use of incorrect cleaning materials. Corrosion due to exposure to salt or chlorine. Damage due to incorrect installation practices. Responsibility for 3rd party cost; indirect or consequential loss.

Electrical data	240v 9w 2700K 600lm 45°
Construction	316 Grade Stainless Steel top. 750Kg load bearing capacity.
Exterior Dimensions	Top 78mm diameter. Body of 70mm. sleeve 66mm x 95mm
